Sodium Chloride

Additive.

<0.1

INSTRUCTION FOR USE

Use 1 glove for each part of the body, as indicated below:

1. Face, neck and chest
2. Right arm and armpit
3. Left arm and armpit
4. Lower body front
5. Right leg and foot
6. Left leg and foot
7. Back
8. Lower body back

If necessary, heat the Swash[®] package before use.

Check the temperature of the gloves of a heated package before use.

The gloves are disposable and each package should be used for one person only.

Skin creases must be patted dry using a towel to prevent moisture-related skin lesions.

Only suitable for external use.

Nursing staff is advised to use up a packet of Swash[®] within 48 hours after opening.

Do not flush down the toilet.

TEST RESULTS

Eye irritation test

Results show that the lotion does not cause any irritation of the cornea and the iris. In addition, the conjunctiva do not swell or turn red.

Skin irritation test

Results show that the Swash[®] Gold Gloves lotion does not cause any irritation of the skin. There was no sign of edema or red skin during or after the test.
